Response to referee's comment

1. Reviewer #1 (Version: 2 Date: 29 November 2010 Reviewer: Andreas Werner)

Comment 1-1: There is one little detail that the authors should clarify: To me, the sentence "These results are consistent with pervious reports suggesting that these RNAs are possibly associated with transcription." needs specification (what aspect of transcription).

Response 1-1: We clarified the sentence with addition of relevant citation (Page 18, marked in yellow).
